Research Overview

My undergraduate research focused on computer vision, with an emphasis on visual recognition and computational photography. During my master's studies, my research has centered on embodied intelligence, including zero-shot navigation, robotic manipulation, and post-training for vision-language-action models. My current work investigates the integration of world models and navigation, with particular emphasis on the relationship between learned world-model representations and navigational maps. In doctoral study, I aim to further develop world models and embodied agent systems for robust perception, planning, and interaction in physical environments.

Research Areas: Embodied Policies and Agent Systems, World Models and Vision Foundation Models, Reinforcement Learning Algorithms and Systems.

Education

M.Eng. Sep 2024–Mar 2027 (Expected)	Shanghai Jiao Tong University (SJTU) SJTU Paris Elite Institute of Technology (SPEIT) Electronic Information Shanghai, China.
Exchange Student Sep 2024–Feb 2025	Institut National des Sciences Appliquées de Lyon (INSA Lyon) Department of Computer Science and Information Technology (IF) Lyon, France.
B.Eng. Sep 2020–Jun 2024	Shanghai Jiao Tong University (SJTU) SJTU Paris Elite Institute of Technology (SPEIT) French; Minor in Information Engineering Shanghai, China.

Research and Industry Experience

Research Intern Mar–Jul 2026	Agibot Robotics - Worked on RL post-training for the Longcheer phone-packaging project. - Investigated whole-body control for wheeled-legged robots, including waist-and-chassis data collection and relative-position control to improve foothold accuracy.
Research Intern Jun–Sep 2024	Alibaba Cloud Studied visual navigation and goal-conditioned representation learning, with a focus on ViNT and NoMaD-style methods for learning navigation policies from visual observations.
Product Intern Jun–Aug 2022	Alibaba Cloud Led product carbon-footprint certification for the Hangzhou Asian Games mascot plush toy, the Gamesfirst zero-carbon licensed product, and supported the China Academy of Art low-carbon platform as a secondary project.

Selected Projects

Industry Projects

Main Contributor Mar–Jul 2026	Longcheer Phone Packaging via Real-Robot RL Post-Training Developed and benchmarked DAgger, AWR, and ALOE for real-robot RL post-training on Agibot's G02 platform. Achieved 90% success on the long-horizon Longcheer phone-packaging task, establishing a repeatable evaluation pipeline for mobile manipulation.
Main Contributor Jun–Aug 2022	Product Carbon Footprint and Low-Carbon Operations, Alibaba Cloud Built a product life-cycle assessment workflow from process data and emission factors in CPCD-China and Ecoinvent. Completed carbon accounting across materials, manufacturing and packaging, supported carbon offsetting, third-party evaluation and the digital zero-carbon label, and delivered the certification report for the Hangzhou Asian Games mascot plush toy. Produced weekly low-carbon campus analytics for the China Academy of Art platform.

Academic Projects

Undergraduate Innovation Practice Program (IPP) Sep 2022–Jun 2024	Open-World Person Tracking and Identity Recognition Developed a working prototype for person detection, tracking, face recognition, and video retrieval in unconstrained surveillance scenes. Reproduced RetinaFace with ResNet-50 and YOLOv5 detection, and established initial gait-face alignment and multimodal-fusion baselines.
Participation in Research Program (PRP) Jul 2021–Jan 2022	Energy Internet Platform Data Interface Design and Development Developed data interfaces for an integrated energy demonstration system in a smart-grid building. Built Schneider Electric-based control and visualization modules that ingested and displayed real-time energy-operation data, delivering a working monitoring prototype.

Awards and Honors

SPEIT Outstanding Freshman Scholarship	2020–2021; CNY 10,000.
SJTU Undergraduate Academic Excellence Scholarship	2022–2023, 2023–2024; CNY 1,000 each.
SJTU Graduate Academic Scholarship	2024–2025; CNY 7,800.
SJTU Basketball Sports Association Cup	2020–2021, 2022–2023; Quarterfinalist.
1st Zhiyuan Cup Graduate Men’s 3-on-3 Basketball Tournament	2025; Third Place.

Technical Skills

Programming Languages	C++, Java, Python, PyTorch, Git. Chinese, English, French.
